## The benefit of using Samsung original supplies

Samsung printing supplies are specially designed to work together with Samsung printer. We assure optimal print quality with sharp, clear output from first print to last.

Remanufactured	Key differences	Comparison of printout quality
	<b>Smudge</b> Yellow streaks and smudges print across the document.	
	<b>Smudge</b> Red streaks and smudges print across the document.	
	<b>Streaks</b> During printing, image density is inconsistent and horizontal and vertical lines appear.	
	<b>Ghost effect</b> Red dots are printed on the document background.	
	<b>Uneven fill</b> The printed characters are blurry and faded so the text cannot be read.	

This information is based on test results of LGA. 2007 Cartridge Comparison Study test results provided by LGA. Testing performed on CLP-510D7K, CLP-510D5C, CLP-510D5M and CLP-510D5Y laser cartridges. Tests were performed under laboratory conditions and actual performance may vary.

### Imagine security labels to prove it is original Samsung

#### Verification of colour changing film

The label changes colour when viewed from different positions. When viewed head-on at an angle of 0° the film is clear. At a viewing angle of about 60° the colour changes to cyan.

#### Verification of colour changing embossed "Samsung Logo"

The embossed characters change colour between red-gold and blue when viewed from different angles. Verification of the embossed character is possible by feeling the texture.
